Summary

Mobile Engineer with 7+ years of experience in cross-platform and native mobile development, specializing in **Flutter/Dart**, **Swift (UIKit)**, and **Kotlin/Java** to build scalable Android and iOS applications with clean architecture. Delivered products across fintech, aviation, healthcare, education, and IoT—including asset-management platforms for high-net-worth clients and consumer apps reaching hundreds of thousands of users with ratings up to 4.9/5. Experienced in end-to-end development, modular architecture, AI/LLM integration, offline-first systems, CI/CD automation, and open-source Flutter tooling.

Experience

- **KTO Group** (iGaming & Entertainment Platform) — Brazil (Remote)
  Mobile Engineer — *Mar 2026 – Oct 2026*
  - **Modular Architecture**: Contributed to a large-scale Flutter app refactor, improving system architecture and developing reusable core, UI, design system, and feature packages.
  - **Performance & Security**: Improved application security, privacy, performance, and stability across Android and iOS, reducing slow cold starts by 75%.
  - **Feature Delivery**: Implemented and migrated critical user flows, including account and compliance verification, in-app notifications, and multi-layered authentication (PIN, biometrics, social login, 2FA).
  - **Release & Observability**: Automated CI/CD pipelines for QA and production builds, enhanced diagnostics via centralized logging and crash reporting, and built initial automated E2E test flows with Maestro.
- **Eleven Systems** (Wealth Management & Family Office Platforms) — Florida, USA (Remote)
  Mobile Engineer — *Oct 2024 – Jan 2026*
  - **Multi-App Ecosystem**: Developed and maintained 5 secure mobile applications (Android & iOS) enabling high-net-worth individuals and family offices to monitor and manage assets, investments, and financial data.
  - **Offline-First Architecture**: Engineered full offline support across all application features, ensuring seamless portfolio access and reliable local data synchronization in low-connectivity environments.
  - **AI/LLM Integration**: Integrated conversational AI/LLM capabilities allowing users to dynamically query and analyze financial data within the platform.
- **Halcyon Mobile** (Mobile & Web Software Consultancy) — Cluj-Napoca, Romania
  Flutter Developer — *Sep 2021 – Sep 2024*
  - **End-to-End Product Delivery**: Developed Android and iOS applications both independently and in agile cross-functional teams of 3–10 members (engineers, designers, QA, product managers).
  - **Multi-Industry Releases**: Shipped 6 production applications: a spiritual app (driving a 40% DAU increase and 4.8/4.9 store ratings), a private aviation app, a physiotherapy companion app (health/fitness tracking), a native Android/Kotlin BLE light-control app, a white-labelled survey app, and a Flutter web educational platform.
  - **Engineering Leadership**: Conducted code reviews to enforce security, code quality, and design standards; standardized internal documentation, built developer tooling, and mentored junior engineers.
- **Neversoft Development** (Digital Products & Software Services) — Cluj-Napoca, Romania
  Product Engineer — *May 2019 – Aug 2021*
  - **End-to-End Engineering**: Architected, designed (UI/UX), and built the first virtual student card in Cluj-Napoca—including database design, backend services (storage, auth, notifications), offline support, and savings tracking—scaling to thousands of students with a 4.9/5 rating on App Store and Google Play.
  - **Team Mentorship**: Organized a summer internship program to attract engineering talent, instructing and leading a team of 11 interns.

Technical Skills

- **Languages & Frameworks**: Flutter, Dart, iOS (Swift, UIKit), Android (Kotlin, Java), SQL
- **Technologies & Data**: Firebase (Cloud Firestore), REST API, JSON, XML, MsSQL, SQLite, ObjectBox, NoSQL, Provider, Bloc, Melos (Monorepo), Stripe Payments, BLE (Bluetooth Low Energy), Google Analytics, Amplitude
- **Architecture & Testing**: Clean Architecture, Domain-Driven Design (DDD), MVVM, MVC, SOLID Principles, OOP, Mockito, Maestro (E2E Testing), Material Design, Apple Human Interface Guidelines
- **CI/CD & Developer Tools**: Git, GitHub Actions, GitLab CI, CircleCI, Codemagic, Fastlane, GitHub Copilot, Claude Code, Cursor, Antigravity, Android Studio, VS Code, Xcode, Figma, Adobe XD, InVision

Education

- **KTH Royal Institute of Technology** — Stockholm, Sweden
  Master of Science in Autonomous Systems (Merit Scholarship, EIT Digital Exit Year) — *Aug 2023 – May 2024*
- **Budapest University of Technology and Economics** — Budapest, Hungary
  Master of Science in Autonomous Systems (Merit Scholarship, EIT Digital Entry Year) — *Sep 2022 – Jun 2023*
- **Babeș-Bolyai University** — Cluj-Napoca, Romania
  Bachelor of Science in Computer Science (Merit Scholarship) — *Sep 2018 – Jul 2021*

Portfolio & Projects

- **Flow Coordinator**: A Flutter navigation and routing API that organizes screens into user flows using the Flow Controller (Coordinator) pattern, featuring full cross-platform support and 100% unit test coverage. (pub.dev/packages/flow_coordinator | KTH Master's Thesis)
- **Workeepr**: Native iOS application for employees to track their work time and tasks (Swift, UIKit, Firebase Cloud Firestore).
- **GenieMail**: AI Chrome extension for writing better emails faster (OpenAI, Make, Airtable, Softr, TypeScript).
- **Snake**: Classic Snake game built in x86 Assembly featuring a graphical user interface.
- **Áprily Stairs**: Cross-platform 2D game developed using libGDX and Java.
- **Firestone**: Functional game engine written in Clojure.

Awards & Certificates

- **A Card – The Virtual Student Card (May 2021)**: 24th Transylvanian Students' Scientific Conference (ETDK), Cluj-Napoca. Awarded **3rd Prize**, **KMDSZ's Special Award**, and invited to present at the Hungarian National Students' Scientific Conference (OTDK) 2023.
- **Cambridge English: Advanced C1 (CAE)**: Issued by Cambridge English (Aug 2017).
